

Dashboard

Widgets

The screenshot displays the CyberHub ECO.DC dashboard interface. On the left, a sidebar contains the 'Dashboard' menu. The main area shows a 'Home / Dashboard' header and a list of widgets, including several red bar charts. A modal window titled 'Add new widget' is open, featuring a list of widget types on the left and a grid for adding them on the right. A red box highlights the widget list, and a red arrow points to it with the text 'Multiple widgets of the same type can be added'. Another red box highlights the 'Add widget button' (a blue square with a white plus sign) at the bottom right of the modal, with a red arrow pointing to it. A 'Close' button is visible at the bottom of the modal.
