Step 4 ถ้า test send mail แล้วไม่ได้ ลองตามนี้

The screenshot shows the 'Mail Settings' page in the CyberHub ECO.DC interface. On the left is a sidebar with navigation options: Dashboard, Alarms, Locations, Contacts, Analysis, Reports, Account, and Administration (expanded). The 'Administration' menu includes User Management, Group Management, License, Parameters, Heatmaps, Part Library, Log Files, Mail Settings (highlighted), Database, and System Properties. The main content area is titled 'E-Mail Server' and includes an 'Edit' button. The configuration fields are as follows:

- Hostname: smtp.gmail.com
- Port: 587
- From address: cyberhubdcim@sitem.co.t (highlighted with a red box)
- Username: cyberhubdcim@sitem.co.t (highlighted with a red box)
- Password: (highlighted with a red box)
- Protocol: SMTP
- Security: TLS (checked)
- Auth: (checked)

At the bottom of the 'E-Mail Server' section are 'Test Mail Server' and 'Save' buttons. To the right is the 'SMS Gateway' section, which is currently disabled (Edit button is greyed out). It includes fields for Hostname, Port (25), Username, Password, and Phone Number, with a 'Test SMS Gateway' and 'Save' button at the bottom. An error message box in the top right corner states: 'Error Invalid Mail Server settings!'. Red text annotations are present: 'ถ้า Test แล้วขึ้นประมาณนี้ เช็ค 2 วิธี' (If you test and get this, check 2 ways), '1.ลองตรวจเช็คอินเทอร์เน็ต' (1. Try checking the internet), '2.ลองเปลี่ยน Email ในการส่ง' (2. Try changing the email for sending), 'Email สำหรับ Test เท่านั้น !!!!' (Email for test only !!!!), 'Email > romgbth@gmail.com' (Email > romgbth@gmail.com), 'Password > obbp vmue lewk ntel' (Password > obbp vmue lewk ntel), and '*หมายเหตุ password ใส่ตัวอักษรพร้อมเว้นวรรค*' (*Note: password includes spaces).
